Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

On page 2, line 1 the word "swivel" is missing the letter "e".

Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Hinte.

Hinte discloses a ball hitch comprising a ball element (50) having a part-spherical outer surface (shown in Figures 3 and 4) and a cylindrical bore (shown best as through 50 in Figure 4), a socket element constructed as a sleeve (55) removably mountable in a drawbar attached to a vehicle (it is removably mountable to members 57 and 58 which are connected to the both the bar 24 and the bars 40 through various means as shown in Figure 3) and having a part-spherical inner surface (shown in contact with 50 in Figure 4) permitting a coupling pin (38) to swivel about multiple axes (a vertical axis shown in Figure 4 and a horizontal axis shown in Figure 5).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hinte in view of Kletzli et al.

Hinte discloses all of Applicant's claimed invention except for an entry groove provided on the inner surface of the sleeve. Kletzli et al. disclose an entry groove (24) provided on the inner surface of a sleeve (16) to avoid swaging operation (this is a benefit for providing entry slots/grooves on the inner surface of the sleeve as discussed in column 1, lines 26-51). It would have been obvious to one of ordinary skill in the art at the time of the invention to provide that entry groove provided on the inner surface of the sleeve on the Hinte ball hitch, as taught by Kletzli et al., in order to avoid swaging operation.

Allowable Subject Matter

6. Claims 3-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3611

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure because it relates to ball element/sleeve type joints.
